

CRAFTSMAN® Unveils New V-Series™ Line of Premium Tools for Automotive and Industrial Use, Backed by a Lifetime Warranty **CRAFTSMAN V-Series™ professional grade tools ensure you'll Never Compromise™ when working in the most demanding applications**

TOWSON, MD (October 11, 2021) – CRAFTSMAN announces V-Series™, a new, premium line of tools for professional automotive and industrial applications. Designed to endure the most demanding applications, the V-Series™ professional portfolio includes hex keys, T-Handles, ratchets, wrenches, socket sets and screwdrivers all backed by the CRAFTSMAN lifetime warranty and conveniently available in stores and online at select CRAFTSMAN retailers.

“From classic car restorations to heavy-duty industrial applications, CRAFTSMAN V-Series™ tools are made to handle the demands of professional level users,” said Jillian Shute, Vice President, Automotive Solutions. “We designed this premium line of tools for those who don't shy away from a frame-off restoration or face demanding conditions at a work site. What’s more, they’re backed by a full lifetime warranty.”

V-Series™ bit-drivers, hex keys and T-Handles are manufactured with innovative X-Tract Technology™, which removes fasteners up to 50 percent rounded while also helping to prevent rounding or stripping of new fasteners. The geometrically designed X-Tract Technology™ grooves create additional engagement points for gripping within a rounded screw, while also reducing interior stress when turning to help prevent rounding of new fasteners. Additionally, all V-Series™ bit-drivers, hex keys and T-Handles are manufactured using premium S2 steel for strength and durability.

Constructed with precision engineered gears, V-Series™ ratchets provide improved tool life and durability. All-metal ratchets are designed with three knurled zones for gripping, while bi-material handles allow for comfort and grip. V-Series™ ratchets also include an enclosed head, recessed directional lever and short arc swings allowing end users to access fasteners in tight spaces without sacrificing strength.

Available in SAE and metric measures, the V-Series™ line offers a complete range of combination, reversible ratcheting and extra-long ratcheting wrench sets designed with an I-beam panel for strength and comfort. These wrenches feature a new extended box end design that enables access to fasteners in recessed positions. Sets include a vertical wrench rack intended to fit most metal storage drawers, providing a compact and portable organization method.

Socket sets, storage rails and accessories in the V-Series™ product line are engineered for performance. All socket sets feature an off-corner design and expert-grade 6-point socket geometry that maximizes the tool’s torque on the flats of fasteners. For enhanced socket-to-fastener action, sockets are chamfered and tapered. In addition, the line includes low profile magnetic socket rails for storage and organization which are available in orange or green high visibility colors.

Proven to be up to 10X more durable* with precision machined tips and premium alloy steel, V-Series™ screwdrivers are designed with the auto and industrial professional in mind blending precision, torque and control. Screwdrivers feature soft touch grips with 2X solvent protection** against common solvents. Larger sizes also include a wide bolster with ample space to grip and wrench when additional torque is required.

CRAFTSMAN V-Series™ tools will be available this fall at select CRAFTSMAN retailers. Select product

information follows below.

SKU	Product Name	MSRP
CMMT87300V	12PC. SAE Combination Wrench Set	\$74.98
CMHT26161V	8PC. X-Tract Technology™ Metric T-Handle Set	\$64.98
CMMT86324V	3/8" Drive Comfort Grip Ratchet	\$54.98
CMMT17380V	13PC. 1/2" Drive SAE 6-Point Socket Set	\$64.98
CMHT26159V	13PC. X-Tract Technology™ SAE L-Key	\$49.98
